COMMITTEE ON NATURAL RESOURCES
SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES
SUBCOMMITTEE ON WATER, WILDLIFE, AND FISHERIES

Congress of the United States
House of Representatives
Washington, DC 20515-0515

COMMITTEE ON SCIENCE, SPACE, AND TECHNOLOGY
SUBCOMMITTEE ON RESEARCH AND TECHNOLOGY
SUBCOMMITTEE ON INVESTIGATIONS AND OVERSIGHT

Dear neighbor,

It's my honor to serve as your voice in Congress. As your representative in Washington, your priorities are my priorities.

I am committed to working on policies that will improve our community by addressing climate change, promoting sustainable energy, defending reproductive freedoms, and enhancing public safety. As a working parent, I understand the cost of living is skyrocketing for families. I am passionate about helping hardworking families so that more can afford child care, housing, health care, and to be able to put food on the table while putting money aside for a better future.

Please feel free to reach out to me and my staff with your thoughts, concerns, and suggestions. I will always work to deliver for you, your family, and our community.

Sincerely,
Kevin Mullin
Congressman Kevin Mullin

▲ Rep. Kevin Mullin visits San Mateo County's Navigation Center in Redwood City, which provides 240 safe interim living spaces for unhoused individuals while they look for permanent housing.

Support for Families

- ✓ **Fighting the Affordability Crisis:** Kevin introduced the *Poverty Line Act* to modernize the way the federal poverty line is calculated to better reflect 21st century costs. This update would support the needs of working families and make millions more families eligible for critical safety net programs.
- ✓ **Focusing on Working Families:** Kevin is a proud member of the *Congressional Dads Caucus* that works to pass family-friendly policies and legislation like paid leave, affordable child care, and the expanded *Child Tax Credit*.
- ✓ **Defending IVF and Reproductive Healthcare:** As a parent who benefited from IVF, Kevin knows every reproductive journey is personal. He advocates for everyone to have access to family planning options and will fight to protect reproductive freedoms.

▲ Rep. Kevin Mullin with Lauren Cheng, winner of his 2024 Congressional Art Competition for District 15, who focused her art on raising awareness about gun violence.

Safer Communities

- ✓ **Tackling Gun Violence:** Kevin serves on the *Gun Violence Prevention Task Force* where he works to advance policies to address the scourge of gun violence and keep our communities safe.
- ✓ **Making Roads Safer:** Kevin co-wrote a letter to the *National Highway Traffic Safety Administration* (NHTSA) to require autonomous vehicle manufacturers to collect more safety data to help regulators and lawmakers improve safety standards.
- ✓ **Funding for First Responders:** Kevin is pushing for a \$16 million increase for *Urban Search & Rescue* teams across the country, like *California's Task Force 3* based in Menlo Park. These highly-trained emergency responders are deployed when disasters strike, and new funding is critical to strengthening the delivery of lifesaving services.

▲ Rep. Kevin Mullin recently held a digital town hall with NOAA Administrator Dr. Richard Spinrad to discuss the science behind climate change and ways the federal government is working to address it.

Confronting Climate Change

- ✓ **Protecting the Environment:** As a member of the *House Natural Resources Committee*, Kevin works to incorporate climate change adaptation strategies into management of federal public lands.
- ✓ **Increasing Sustainable Energy:** Kevin requested increased funding for the *Solar Energy and Wind Energy Systems Integration* programs to maintain America's global leadership on renewable energy development and help double our domestic power generation capacity.
- ✓ **Making Shipping and Air Travel Cleaner:** Aviation accounts for 3.5% of global greenhouse gas emissions. That's why Kevin successfully passed provisions in the *FAA Reauthorization Act of 2024* to invest in green alternatives to aviation fuel, and introduced the *International Maritime Pollution Accountability Act* to reduce shipping pollution.
